

Remarks:

This amendment is submitted in an earnest effort to advance this case to issue without delay.

Claims 9 and 10 objected to for lack of illustration have been canceled to moot the objection.

Claim 13 has been amended in accordance with the comments made by the examiner in the "Response to Arguments" section of the office action regarding the minimum resolution. The "means" clause of the main claim has now been amended to describe this minimum resolution. In addition claim 13 has been amended to positively cite the tool head and machine member, as this is the context in which the invention is most effective and novel.

As amended claim 13 clearly defines over the cited art. In particular Pieczulewski (US '488) positions the cutter 212 by exchanging wedges 226 and 228 with wedges 234 and 236. This is a far cry from the system of this invention. The same is true for US '780 of Saj.

Thus the amended claims clearly define over the cited art. Notice to that effect is earnestly solicited.

Respectfully submitted,
K.F. Ross P.C.
